## ☐ Horror app Concept/Idea

- An app that has a database of horror movies/films.

## ☐ Who's the targeted audience?

- For fans of horror
- Beginner Horror fans

## ☐ What makes this app special?

- This app will have special features called:
  - Rooms
  - (Users can also discuss about actors performances)

## ☐ What are Rooms?

- Rooms are different categories of a movie users can explore.
- Categories:
  - Lore: The user can see what the general lore/main reasoning of certain things in a movie. They can also see what other users think.
  - Moral of the story: The user can find what is a life lesson that can be taken away from this movie if any. The user can see other user inputs.
  - Discussions: Users can talk about how they feel about certain movies.
  - Quiz: User can test their knowledge on certain movies. Users can compete with each other.
  - Collections: Users can keep track of the movies they've watched

## ☐ Will the user be able to rate movies?

- Yes, However there will be categories to rate the movie. This is to ensure that there is a logical reasoning as to why a movie was good or bad. The users can communicate with each other in any of the categories to help understand each others point of view and potentially change their rating in a certain category/categories. When a user finishes rating every category of a movie, their total score will be compared to other users and the average of all users will be taken for the official score.

↙ This topic is just for fun; not serious at all...

## ☐ Any other features in the future (No)?

- Point system / and DLC to Horror fighting game
- Clubs / friend groups
- Exclusive merch
